PROFESSIONAL FM TRANSCEIVER

Intelligent voice intercom system

1、 Overview

Office call device refers to a tool used in enterprises and institutions to wirelessly achieve simple calling processes, such as: leaders finding secretaries, leaders finding drivers or other department managers, etc. Our company lacks this language in the market After years of research and development, we have launched the Business Office Wireless Voice Aggregation System, a business calling device for voice communication.

2、 Scope of application:

Business office wireless calling system: used for office leaders, employees, or various places that require frequent short distance and long time voice calls. (such as club member calls, customer service calls to the front desk, company office calls, etc.).

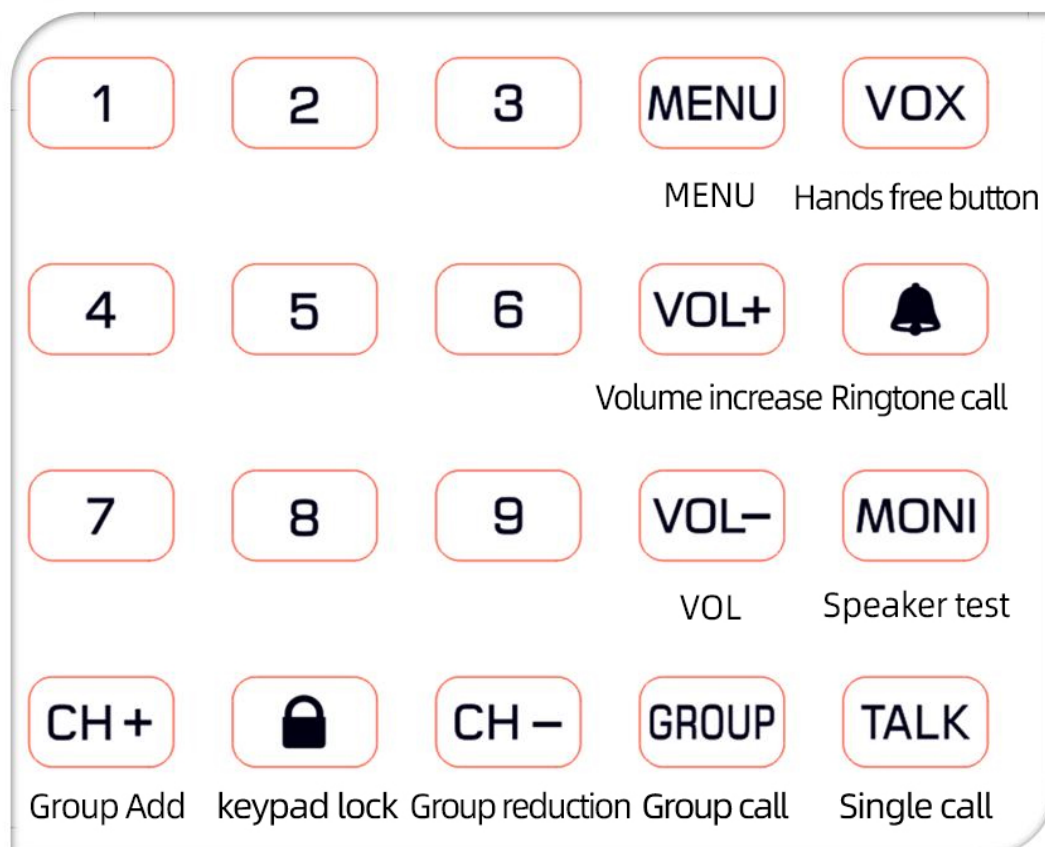

3、 Characteristics and advantages

No wiring required, no need to change the original decoration, reliable reception, stable operation.

4、 System Description

Free networking - This product consists of two parts: a "multifunctional calling machine" placed on the leader's office desk and a "receiver" placed on the staff's desk. Users can customize the host number, extension number, call group, and channel; Can form a free network and call freely. Group call, single call, without distinguishing between host and extension, hands-free intercom, convenient for situations where buttons are not suitable.

It can be divided into 20 groups, with one group that can be infinitely increased. The group can listen to and talk to each other, with a maximum range of 3 kilometers. There are 8 levels of volume to choose from, and 6 groups of ringtones to choose from for calling.
