# Operation instructions

## USER'S MANUAL

**Professional wireless intercom**  
**PROFESSIONAL FM TRANSCEIVER**

Thank you for choosing our products, please find and read this manual before using. **You will receive** Radio\*1

Antenna-1 pcs, 1 battery, 1 clip & belt, 1 charger, 1 manual. **Charging**

Put battery to the desktop charger and put the plug into the AC Power, then you will see the led light is red which means battery is in charging now.

It will take 3-4 hour to charge full and the led will turn green. And then you can take off the battery and the plug.

### Caution:

As usual, the led of the charger is red when the battery is charging. However, it will twinkle while the battery is broken or charging in a hot environment.

Please don't take the radio with the antenna or knob.

Please clean the dust/spot with a no fuzzing towel, which would avoid poor connect.

Please cover the interface while you don't use the radio.

Please clean the dirty buttons and knob with neutral detergent or wet cloth after long term use, but no strong corrosive chemical reagent.

The batteries do not be full charged when they leave factory. Please charge or take a new one after long time without use. The battery will reach a best level after 2 or 3 times' fully use. You will need to charge or change the battery when it sustains poor capacity.

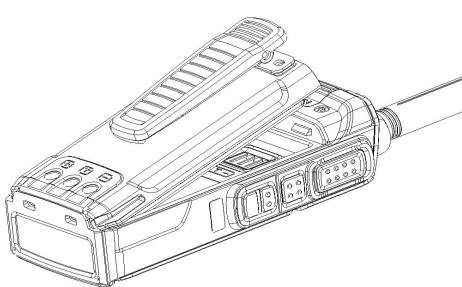

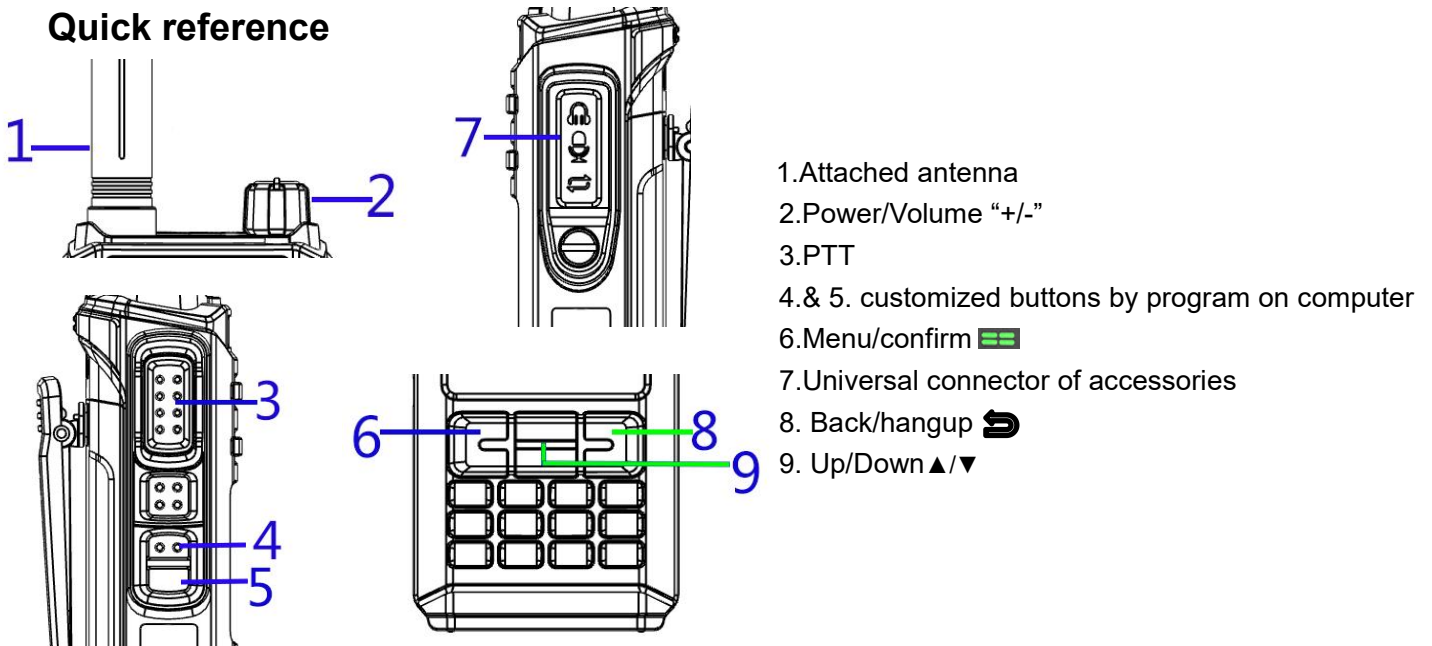

Please don't put battery into fire & disassemble the battery pack. The radio/battery should charge in temperature 0-40°C, otherwise, it might affect the normal use of battery. Don't pull off the power and the battery which may interfere the charging procedure. The life of the battery will be cut down or damaged even though you have followed the correct step of battery use.

### Warning

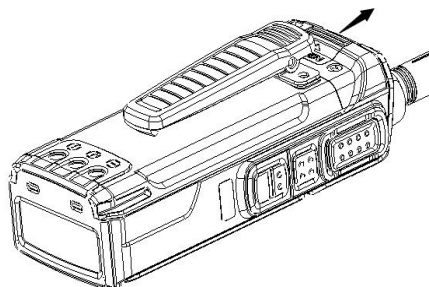

All battery will give risk to your body or damage by key, decoration, jewelry when they connect to the terminals of battery. Because the conductive metal may cause short circuit, which may produce great quantity of heat. Be careful when you handle any battery, particularly putting them into the clothes, bag, or metal container.

(DMR without screen)

- 1-Attached antenna
- 2-Channel
- 3-Power/Volume
- 4-PTT
- 5 & 6-customized buttons by program
- 7- Universal connector of accessories

# Operating reference

- 1) Put on the battery as PIC [1] and antenna, A “da” sound indicates proper installation of battery.  
Take off the battery like PIC [2].  
Screw the clip on the battery as PIC [3].
- 2) Turn the power knob “3” clockwise, a short music rings and broadcasting the current channel.
- 3) Use knob “2” to select a channel, press PTT “ 4 ” button and hold to transmit with the same frequency in effective distance range, release the button to stop transmitting after finish.

# Accessories use

If a Speaker/Microphone is available, remove the plastic cap and its mounting screws from the right side of the transceiver, then insert the plug of the Speaker/Microphone into the MIC/SP jack; secure the plug using the screws supplied with the Speaker/Microphone. Hold the speaker grille up next to your ear while receiving. To transmit, press the PTT switch on the Speaker/ Microphone, just as you would on the main transceiver’s body, and speak into the micro-phone on a normal voice level.

Note

- 1) Save the original plastic cap and its mounting screws. They should be reinstalled when not using the Speaker/Microphone.
- 2) When you press the PTT switch on the Speaker/Microphone, it disables the internal microphone, and vice versa.

# Simple trouble removed

<b>Problem</b>	<b>Settle</b>
no power	1. the battery may be power off, change a new one or charge it 2.the battery do not have a good assembling.
the battery cant work for long time after full charging	the life of battery is end, please change a new battery.
cant talk to the members in a team/group	1.please make sure you are in the same frequency & the setting of QT/DQT is the same with others 2.maybe you are too far away, please be in the limited distance.
hear other voice which do not belong to the team/group	please change the QT/DQT setting of all radios of team/group
the radio is beeping	the frequency is blank, please turn to the other channel or write a frequency
